

Electric Power Generation Center

Good & Best Technologies and Practices for Electric Power Industry

Code	Program Title
AET625	Advanced Electrical Technology for Non-Electrical Engineers
AIB595	Advanced Industrial Boiler Processes, KPIs and Skills
AES555-1	Alternate Energy Source Strategies for your Organization
GPW312-1	Boiler Tube Failures and Boiler Maintenance
PCM530-1	Condition Monitoring and Management of Power Plant Equipment
PEM109-1	Designing & Regulating Competitive National Electricity Markets
INS672-1	Electrical Engineering Project Construction Inspections Skills
ETN624	Electrical Technology for Non-Electrical Engineers
EMD380-1	Energy Markets and Energy Derivatives
IBP594	Industrial Boiler Processes, KPIs and Skills
PNT700-1	Latest Thermal Power Plant Technologies
POW308-1	Management Analysis, Operational Audit and Performance Evaluation of Electric Power Generation Plants
PEQ350-1	Managing Installation of Electrical Equipment and Control Systems
PEQ340-1	Managing Troubleshooting and Maintenance of Electrical Equipment
POW388-1	Operational Audit & Performance Evaluation of Electric Power Generation Plants
POW380-1	Operational Audit and Performance Evaluation of Power Generation Plants
